Art Unit: 2622

1. The Double patenting rejection has been withdrawn due to The Terminal Disclaimer filed on 6/2/06.

Applicant's arguments with respect to claims 70-83 have been considered but are moot in view of the new ground(s) of rejection.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 70-74 and 77-81 are rejected under 35 U.S.C. 102(e) as being anticipated by Conway (US 5,444,476).

With regard to claim 70, Conway discloses in Fig. 6, a video teleconferencing system that comprises the apparatus for communicating with a camera (teleconferencing system shown in Fig. 6 includes video cameras 14d and 14d', col. 9, lines 19-40), the camera being controllable from each of a plurality of control apparatuses through a communication system (PTR control

22d and 22d', col. 9, line 21), said apparatus comprising a connecting device (communication interfaces 28 and 30) adapted to connect to the camera and a control device adapted to inhibit others of the plurality of control apparatuses from controlling the camera in the case that one of the plurality of control apparatuses controls the camera through the communication system (PTR control 22 or 22' is inhibited to control the other camera in case more than one pointer appears in the display 26, 32 or 26', 32', col. 10, lines 1-17).

With regard to claim 71, Conway discloses in Fig. 6, a video teleconferencing system that comprises the control apparatus controls each of a plurality of cameras (PTR controls 22 and 22' controls cameras 14d or 14d').

With regard to claim 72, Conway discloses in Fig. 6, a video teleconferencing system that comprises the control apparatus comprises a designation device adapted to designate a desired image on a screen of a display device (PTR control 22 or 22' generates pointers used to designate an image on display 26d or 32d).

With regard to claim 73, Conway discloses in Fig. 6, a video teleconferencing system that comprises the control device inhibits another control apparatus from controlling the camera for a predetermined period of time (PTR control 22d or 22d' is

Art Unit: 2622

inhibited in the period in which both of pointers appear on the displays, col. 10, lines 1-17).

With regard to claim 74, Conway discloses in Fig. 6, a video teleconferencing system that comprises the control device releases the other control apparatus from being inhibited from controlling the camera after the predetermined period of time has lapsed (PTR control 22d or 22d' is inhibited in the lapsed time period in which both of pointers appear on the displays, col. 10, lines 1-17).

Method claims 77-81 correspond to apparatus claims 70-74 and are analyzed the same as previously discussed with respect to apparatus claims 70-74.

3. Claims 75-76 and 82-83 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. This Office action is not made final due to new grounds of rejection.
